Weekly Reflection Report

Name & Reg.No: 1. Julius B Thomas (2462095)

2. Steven Mathew (2462157)

3. Mishaël Julian (2462184)

4. Rahul J Prakash (2462133)

5. Abhishan Francis (2462835)

Class : 5BTCS AIML A

Title of Project : DAKSH Judicial Research and Court Case Information Platform

Community Details: DAKSH Society, 63, Palace Road, Vasanthanagar, Bangalore - 560 052
(Organization Focus: Law, Governance, and Judicial Policy Research)

ODDSEM:

S.NO.	Date	Goals and Objectives	Methodology	Team Work (Individual contribution)
1	Week 1	Understand DAKSH community requirements and judicial research context.	Studied collaboration objectives with DAKSH; analysed judicial research workflows and identified core information needs for court-case studies.	• Julius: Formulated user requirements and research goals. • Steven: Studied eCourts access structure. • Mishael: Evaluated scraping feasibility. • Rahul: Outlined data validation needs. • Abhishan: Planned structured data storage.
2	Week 2	Study eCourts portal structure and case data hierarchy.	Explored eCourts navigation flows; analysed sections including case details, hearing history, daily status, processes, and orders/judgments.	• Julius: Defined key legal fields for researchers. • Steven: Mapped court and case navigation paths. • Mishael: Built initial extraction prototypes. • Rahul: Analyzed court date attributes & types. • Abhishan: Designed schema for case entities.
3	Week 3	Develop and test automated case data acquisition workflow.	Implemented browser-based automation to extract case records from eCourts, handling query parameters and multi-section case views.	• Julius: Verified legal data scope coverage. • Steven: Enhanced navigation logic across courts. • Mishael: Automated scraping & extraction pipeline. • Rahul: Inspected raw output for missing fields. • Abhishan: Structured records for database export.
4	Week 4	Validate extracted datasets and refine field mappings.	Verified extracted fields against source portal; distinguished distinct date types (hearing, process, order, disposal) and resolved schema redundancies.	• Julius: Reviewed semantic accuracy for research. • Steven: Handled edge cases and pagination. • Mishael: Refined extraction scripts & field maps. • Rahul: Validated date mappings and accuracy. • Abhishan: Normalized relational data schema.
5	Week 5	Plan researcher-facing platform and future analytics scope.	Designed architecture for case search, filtering, and workspace views; discussed future scope for research analytics and NLP assistance.	• Julius: Outlined search/filter criteria for policy. • Steven: Defined case detail presentation flow. • Mishael: Integrated pipeline export for analysis. • Rahul: Established consistency & QA guidelines. • Abhishan: Designed case workspace & search UX.
